

Pushkar Shirish Dandekar

Boston, MA (open to relocation) | 857-334-8759 | dandekar.p@northeastern.edu | [LinkedIn](#) | [GitHub](#)

Data Analytics Engineer with 3+ years of experience building scalable Machine Learning models and pipelines, optimizing analytics workflows, and delivering actionable insights using Python, SQL, Snowflake, DBT, AWS and BI tools

EXPERIENCE

Data Engineer, KGS Technologies | Atlanta (remote), GA, USA

Feb 2025 – Present

- Created robust staging and mart layers with dbt to ensure traceability from source systems to reconciled outputs; implemented rigorous unit tests to validate business logic

Data Engineer, Match4Action Crowd Doing | Boston, MA, USA

Jan 2024 – Jan 2025

- Implemented **dbt models** and scheduled them using Airflow DAGs, reducing manual SQL refresh tasks by 90%, saving an estimated **12+ analyst hours per week**
- Containerized the Airflow setup using **Docker and Astro CLI**, allowing rapid local development and seamless portability across environments
- Developed reusable DAG templates and dbt macros, accelerating future pipeline development efforts by an estimated **30%**

Data Engineer, McKinsey & Company | Boston, MA, USA

Jan 2023 - Aug 2023

- Architected self-serve analytical dashboards using dbt, Python and Snowflake, synthesizing data from 10+ sources to deliver actionable insights on trade trends and anomalies
- Developed unit-tested DBT transformations and conducted regression testing for high-risk data pipelines to ensure accuracy and model reliability across iterations
- Transitioned existing Alteryx workflows to KNIME to reduce licensing costs and improve scalability, ensuring seamless data processing without disrupting business operations
- Developed complex SQL-driven analytics to rank product performance across markets, influencing strategy decisions and contributing to a 20% increase in successful product launches

Graduate Teaching Assistant, Northeastern University | Boston, MA, USA

May 2022 - Dec 2023

- Innovated and administered 15 high-impact assessments, covering python programming, data cleaning, preparation, restructuring, and best practices for analytics and traditional machine learning

Data Engineer, JioPlatforms Pvt. Ltd – Reliance Industries | Mumbai, India

Aug 2018 - Aug 2021

- Built and maintained scalable data reconciliation pipelines in Python and SQL, comparing transactional data across systems (Snowflake, ERP, and API ingestions) to ensure 99.9% accuracy for customer analytics reporting
- Built modular ETL pipelines on AWS using Glue and S3 to ingest and reconcile data from third-party APIs, internal systems
- Designed and implemented a Customer 360 dashboard (Power BI) combining feedback, purchasing behavior, and support data, driving 20% higher conversion rates through personalized campaign strategies
- Created and maintained comprehensive ER diagrams and architectural documentation to illustrate data lineage and transformation logic, improving cross-team communication

EDUCATION

Northeastern University | Master of Science, Information Systems | Boston, USA

Sep2021 - Dec 2023

University of Mumbai | Bachelor of Engineering, Information Technology | Mumbai, India

Jul 2014 - Jun 2018

TECHNICAL SKILLS

Languages:	SQL (SparkSQL/HiveQL/PL-SQL), Python (scripting/automation), Java, Shell scripting
Databases/Big Data:	Snowflake, Redshift (AWS), MongoDB (NoSQL), Cassandra, SAP Cloud, SAP HANA
ETL/BI Tools:	Airflow DAGs, Talend, Alteryx, Tableau, Power BI, Hadoop, Hive, Spark/PySpark, DBT
Cloud Technologies:	AWS (S3/Redshift/Glue/EMR/IAM roles), GCP (BigQuery/GCS), Azure Data Factory
Certifications:	AWS Cloud Practitioner, Snowflake – SnowPro Core Certification*
