Boston, MA | (857) 334-8759 | dandekar.p@northeastern.edu | [LinkedIn](#) | [GitHub](#)

Data Engineer with 3+ years of experience building scalable Machine Learning data pipelines, optimizing analytics workflows, and delivering actionable insights using Python, SQL and AWS cloud

EXPERIENCE

AI/ML Software Engineer, KGS Technologies | Atlanta (remote), GA, USA Feb 2025 - Present

- Built data pipelines to curate and transform customer data for **unsupervised machine learning-driven segmentation**, enabling targeted marketing strategies that **increased campaign conversion rates by 25%**

AI/ML Software Engineer, Match4Action Crowd Doing | Boston, MA, USA Jan 2024 – Jan 2025

- Developed real-time data pipelines using **AWS (Kinesis, Glue, Lambda)** to process streaming data, improving analytics speed and reducing batch processing overhead
- Migrated legacy processing code to **AWS EC2 instances**, **improving computation speed by 40%** and enabling real-time decision making for critical business workflows

Data Engineer, McKinsey & Company | Boston, MA, USA Jan 2023 - Aug 2023

- Architected **self-serve analytical dashboards** using **Python and Snowflake**, synthesizing data from **10+ sources** to deliver **actionable insights on trade trends and anomalies**, driving strategic decision-making
- Engineered 10+ scalable data models, integrating APIs and disparate data sources into **Snowflake**, enabling **cross-functional teams** to formulate targeted business strategies and improve delivery operations
- Leveraged Python/Pandas **to build predictive models for global trade data**, identifying emerging trade corridors and helping clients capture untapped market opportunities
- Developed complex SQL-driven analytics to rank product performance across markets, **influencing strategy decisions** and contributing to a **20% increase in successful product launches**

Graduate Teaching Assistant, Northeastern University | Boston, MA, USA May 2022 - Dec 2023

- Innovated and administered 15 high-impact assessments, covering python programming, data cleaning, preparation, restructuring, and best practices for business intelligence and statistical methods – t-test, Chi-squared, p-value

Data Engineer, JioPlatforms Pvt. Ltd – Reliance Industries | Mumbai, India Aug 2018 - Aug 2021

- Architected real-time and batch ETL pipelines (15+)** using Python to integrate customer data from GCS, optimizing marketing personalization and **increasing conversion rates by 20%**
- Modernized financial reporting by migrating Tableau extracts to **Amazon EMR with SparkSQL**, reducing refresh time from **4 hours to 5 minutes**, saving **\$75K annually**, and enabling **near real-time business insights**
- Designed and implemented a **Customer 360 dashboard (Power BI)** combining feedback, purchasing behavior, and support data, driving **20% higher conversion rates** through **personalized campaign strategies**
- Collaborated with product owners and SMEs to review code and align data engineering with software best practices

Academic Project

RAG based LLM assistant using Streamlit and Snowflake Jan 2024

- Developed a RAG-based chatbot** using **Snowflake Cortex Search and LLM functions**, enabling real-time, context-aware responses by integrating product manuals as a knowledge base

EDUCATION

Northeastern University | Master of Science, Information Systems | Boston, USA Sep2021 - Dec 2023

University of Mumbai | Bachelor of Engineering, Information Technology | Mumbai, India Jul 2014 - Jun 2018

TECHNICAL SKILLS

Languages:	SQL, Python, C, Java, shell scripting, Linux, Jira, Git, Unix scripting
DB and Frameworks:	MSSQL, NoSQL, MongoDB, Hadoop, Hive, Airflow, Streamlit, Spark/PySpark, DBT
ETL/BI Tools:	Talend, Alteryx, DOMO, SAP Data Services, Power BI, Tableau, Excel, Looker
Cloud Technologies:	AWS (S3, IAM, EC2, Redshift, Glue, Quicksight, Kinesis, Firehose), GCP (GCS, BigQuery), Azure, Oracle
Certifications:	AWS Cloud Practitioner
